Omar Sherif

Computer Science Student

omarsherif3444@gmail.com |Omar Sherif | LinkedIn | https://github.com/Omar-Sherif3444 | 01016825097

Motivated Computer Science student specializing in Full-Stack and React Frontend Web Development. Hands-on experience building Java, Spring Boot, and Node.js applications alongside modern web tools like React, Next.js, and TypeScript. Competitive programmer with proven problem-solving abilities, awarded for web development excellence, and equipped with professional communication and freelancing skills.

Education

B.Sc. in Computer Science Expected Graduation: 2028

Arab Academy for Science, Technology & Maritime Transport (AASTMT)

Technical Skills

- **Programming Languages:** Java, C, C++, JavaScript, TypeScript, Python
- **Frontend Development:** React, Next.js, HTML5, CSS3, Bootstrap, Three.js, UX/UI Design Principles
- **Backend & Web Tech:** Spring Boot, Spring MVC, Node.js, Express, NestJS, PHP, Thymeleaf, Hibernate, Supabase, PostgreSQL
- **DevOps & Tools:** Docker, Git, GitHub, MySQL, VS Code, Postman, Vercel
- **Core Competencies:** Data Structures, Algorithms, Competitive Programming, Problem Solving, Unit Testing
- **Soft Skills & Professional:** Freelance Strategy, Technical English, Business Communication, Presentation & Teamwork

Honors & Achievements

53rd Place – ECPC Qualifications Collegiate Programming Contest July 2025

International Collegiate Programming Contest (ICPC)

- Competed in the official Egyptian Collegiate Programming Contest Day 1 qualifications, solving complex algorithmic problems under time constraints.

Best Web Programming Project Award Faculty of Computer Science (AAST) • Recognized for exceptional full-stack implementation of the PHP Cinema Booking System featuring custom seat reservation, security features, and dynamic database connectivity.

Training & Initiatives

Digital Egypt Pioneers Initiative (DEPI) – Software Development Track Expected Completion: Jan 2027 *React Frontend Web Developer Profile*

- Intensive specialization in modern frontend architecture covering React, Next.js, TypeScript, and UI/UX best practices.
- Hands-on experience with Node.js/Express, NestJS backend integration, containerization using Docker, and automated unit testing.
- Completed comprehensive training modules in **Business English**, **Professional Soft Skills** (Communication, Presentation, Problem Solving), and **Freelance Coaching** (Client Communication, Profile Optimization, Proposal Writing).

Build with AI – Masr Edition 2025

Google for Developers & ITI

- Participated in technical sessions covering artificial intelligence concepts, modern dev tools, and real-world deployment practices.

Angela Yu Python Bootcamp *In Progress*

- Practical training focused on Python logic building, data science libraries (Pandas), and object-oriented project design.

Projects

Barbershop Booking & Management System (React & Supabase) *Full-Stack Web Application*

Live: Project Link

- Built and deployed a production booking and management system for a real client (Ahmed Ramdan Barber Shop) using React, TypeScript, Vite, Supabase (PostgreSQL, Auth, Realtime), and Vercel.
- Developed a real-time Three.js 3D shop floor and online seat reservations that expire automatically after one hour.
- Secured owner, staff, and customer roles with row-level security; built a bilingual Arabic/English owner dashboard with KPIs, reports, and CSV export.

Online Cinema Booking System (Spring Boot) *Full-Stack Web Application*

GitHub: Project Link

- Engineered a web application using Spring Boot, Spring MVC, Hibernate, and Thymeleaf.
- Integrated secure user authentication and dynamic seat reservation with double-booking prevention.
- Developed QR-based ticket generation and a responsive Bootstrap UI for browsing movies and tracking booking history.

Online Cinema Booking System (PHP & MySQL) *Full-Stack Web Application*

GitHub: Project Link

- Built a complete movie reservation portal leveraging PHP, MySQL, HTML, CSS, and JavaScript.
- Implemented interactive seat reservation with real-time booking validation and MySQL database integration.

Energy Consumption Calculator *Java Desktop Application*

GitHub: Project Link

- Designed an OOP-driven desktop GUI application using Java Swing to compute household energy usage and cost estimation.

Python Bootcamp Projects *Logic Building & Game Development*

GitHub: Project Link

- Developed multiple interactive projects (Hangman, Blackjack, Coffee Machine) focused on practical algorithm building and application logic.

Languages

• **Arabic:** Native | **English:** Business Professional / Technical
